

# Ruchita Verma *Software Developer and AI enthusiast*

✉ [ruchita.verma0604@gmail.com](mailto:ruchita.verma0604@gmail.com) ☎ +91 7224897978 [in](#) LinkedIn [G](#) Github [P](#) Portfolio 📍 CG, India

## Summary

Final-year Computer Science student with hands-on experience in AI/ML, data analysis, and full-stack web development. Built end-to-end projects involving deep learning, computer vision, and scalable web applications. Strong in Python, SQL, and problem-solving, seeking opportunities in Software Development, AI/ML, or Data Analytics roles.

## Education

### Btech in Computer Science and Engineering

Bhilai Institute of Technology , Durg

7.5 CGPA

10+2

Krishna Public School , Bhilai

10th - 94% 12th - 89%

## Projects

### Skin Disease Detector (Using CNN) [🔗](#)

- Developed a multi-class skin disease classification system by designing and training a CNN model using TensorFlow/Keras, achieving ~92% test accuracy
- Improved model generalization by applying data augmentation and dropout techniques, reducing overfitting during training
- Processed and structured medical image datasets using OpenCV and NumPy for efficient model training
- Tech Stack: Python, TensorFlow, Keras, OpenCV

### Flowchart Plagiarism Detection

- Designed a plagiarism detection system for flowcharts by extracting structural features using OpenCV and converting diagrams into comparable representations
- Created a custom dataset of flowchart images and developed preprocessing pipelines (grayscale conversion, edge detection) to standardize inputs
- Proposed a graph-based similarity approach to compare diagram structures and detect plagiarism patterns
- Tech Stack: Python, OpenCV, Image Processing.

### Anyshare- File Sharing App [🔗](#)

- Built a secure file-sharing web application using Flask and Firebase, enabling users to upload files and retrieve them via unique access codes
- Implemented backend logic for file handling, storage, and retrieval, ensuring efficient data flow and user interaction
- Designed responsive frontend interfaces using HTML, CSS, and JavaScript for seamless user experience
- Tech Stack: Flask, Firebase, HTML, CSS, JavaScript

## Skills

Languages — Python | C | C++

Web Development — HTML | CSS | JS | Flask | BootStrap

Machine Learning and Data processing — CNN | PyTorch | Keras | Tensorflow | Pandas | Numpy | Matplotlib

Database and tools — SQL | Firebase | Git | Github

## Professional Experience

05/2025 – 07/2025

Bhilai, CG

### Full Stack Developer Intern

VikaasGarh [🔗](#)

- Designed and deployed a ready-to-launch **website** with modern UI, responsive design, and animations.
- **Improved user experience** and site performance, reducing load times by 25%.
- Took on additional roles as **Social Media Manager & Content Writer**, boosting engagement by 50% across platforms

2024 – 2024

Bhilai, CG

### Web Development Intern

Hustlers Originals (formerly snipedia) [🔗](#)

- Collaborated with the team to **design and launch a website** for a new business venture.
- **Enhanced frontend responsiveness** and usability by approximately 45%, leading to improved client satisfaction

## Leadership and Activities

04/2024 – 01/2026

### The Astro Club , BITD

Vice President

- Led and coordinated a team of 25 members, ensuring smooth communication and collaboration across departments.
- Acted as a primary point of contact between faculty, external speakers, and club members.
